ABOUT ME

I am currently working as a FullStack Web Developer at IT VISION HUB Software Co.,Ltd in Myanmar. I would like to make use of my technical skills and interpersonal skills to achieve company goals and customer satisfaction. I have strong confidence in working with the team. I have 4 years of hands-on coding experience including over 4 years of working experience.

Professional Experience

ITVISION HUB Co.,Ltd (Senior Web Developer) 2021-Present

- Led the development of websites, implementing key features and ensuring high performance and scalability.
- Utilized **PHP** and **Laravel framework** for backend development, and **HTML, CSS, JavaScript, Bootstrap, Tailwind, Vue.js, and React.js** for frontend development. Integrated **Livewire and Blade template engine** for enhanced frontend efficiency and functionality.
- Managed version control with **Git**, ensuring codebase integrity and collaboration among team members.
- Employed **Docker** and **Kubernetes** for containerization, facilitating efficient development and deployment processes.
- Implemented database normalization techniques for optimized data storage and retrieval, utilizing **MySQL** and **SQLite** databases.
- Deployed applications on **DigitalOcean droplets** and **AWS EC2** instances, optimizing server configurations for performance and security.
- Established **CI/CD pipelines** to automate deployment processes and streamline development workflows.

ITVISION HUB Co.,Ltd (Junior Web Developer) 2019-2021

- Proficient in **PHP, Laravel, Bootstrap, HTML5, CSS3, JavaScript**, and **Git**.
- Experienced in **MySQL** database management for backend functionality.
- Implement responsive web design principles to optimize user experiences.
